Continuing operations - diluted (Euros)	0.29	0.22	0.32	0.21	1.04

Notes

- The discontinued operations above include:
 - Unilever Cosmetics International (sold in July 2005) and reported as discontinued operations from the second quarter of 2005; and
 - Frozen Foods businesses in a number of countries in Europe whose planned sale was announced in February 2006. This includes profits on disposals of some small businesses, which were sold early in 2005.
- The Mora frozen snacks business (annual sales of around €100 million), is included in continuing operations, as required by IFRS 5. The planned sale of this business was announced in September 2005 and it was sold in March 2006.
- Frozen foods shares certain services and costs with other parts of Unilever. Those shared costs, which are not being transferred with the business and are not expected to be immediately sheddable have been retained within continuing operations.
- At the Annual General Meetings held on 8 May and 9 May 2006, shareholders gave approval to proposals to bring about an equivalence between NV and PLC shares. This will be achieved by subdividing each existing NV share of €0.51 into three new shares of €0.16 and by consolidating PLC shares on the basis of 9 new shares of 3 1/9 pence for every 20 shares of 1.4p. Corresponding changes are being made to the NV and PLC share units traded in US dollars on the New York Stock Exchange. As a result of these changes, which will have effect from 22 May 2006, all Unilever shares represent an equivalent share of ownership of the business. Earnings per share figures given above are calculated on the basis of the new share denominations.

Notes

1. The frozen foods operations which are to be retained are included within savoury, dressings and spreads.
2. The frozen foods business planned to be sold and treated as discontinued operations, shares certain services and costs with other parts of Unilever. Those shared costs which are not being transferred with the business and are not expected to be immediately shed have been retained within continuing operations and reduce the remaining category segmental operating profits and margins accordingly.
